B.TECH COMPUTER SCIENCE & ENGINEERING STUDENT

Professional Summary

B.Tech 4th-year student with a strong foundation in programming, data structures, object-oriented programming, and database management. Skilled in Python, Java, SQL, and web technologies, with an interest in developing efficient, reliable, and scalable software solutions. Eager to apply technical knowledge, learn new technologies, and contribute to real-world software development projects.

Technical Skills

- **Languages:** Python, Java, SQL
- **Core Java:** Java Fundamentals, Identifiers, Data Types, Type Casting, Object Creation, Variables, Operators, Control Flow Statements, Loops, Constructors, Methods, Encapsulation, Abstraction, Inheritance, Polymorphism, Method Overloading & Overriding, Method Hiding, Abstract Classes, Interfaces, Object Class, String, StringBuffer, StringBuilder, Wrapper Classes, Autoboxing & Unboxing, Factory Method, Singleton Class
- **Web Development:** HTML5, CSS3, JavaScript
- **Backend & Infrastructure:** FastAPI, Flask, REST APIs, Docker
- **AI / Generative AI:** LangChain, Groq API, Ollama, HuggingFace, DeepFace, RAG pipelines, NLLB-200, Deep Learning, RNN/LSTM
- **Tools & Platforms:** Git/GitHub, VS Code, Antigravity, Google Colab

Projects

Sentix — Real-Time Emotion-Aware Multilingual Empathy Companion **2026**

Team Project (Major Project, Group of 2) | Flask • DeepFace • Llama 3 (Ollama) • NLLB-200 • OpenCV • PyTorch

- Built an AI companion that combines real-time facial emotion detection (DeepFace) with empathetic LLM response generation (Llama 3 via Ollama), conditioning replies on both user text sentiment and detected facial expression.
- Implemented bidirectional multilingual translation across 11 Indian languages using the NLLB-200 model, plus low-latency sentence-level streaming responses and a safety layer for sensitive-topic handling.

Medical AI Assistant **2026**

Independent Project | Flask • LangChain • FAISS • HuggingFace • Groq API

- Developed a RAG-based medical query assistant using FAISS vector storage and HuggingFace sentence-transformer embeddings to retrieve relevant context, with Groq-accelerated LLM inference for responses.
- Implemented Flask session-based conversation management to maintain continuous context across a multi-turn chat interface.

Human-AI Memory Continuity System — 2nd Prize, CHAKRAVYUH 1.0 **Jan 2026**

Team Innovastra, Sri Sri University | National-Level 36-Hour Hackathon, GITA Autonomous College, Bhubaneswar

- Won 2nd Prize among national competitors for designing an AI system focused on preserving contextual memory continuity across human-AI interactions, built under a 36-hour deadline.

Education

- **B.Tech in Computer Science & Engineering (AI/ML)**, Sri Sri University, Cuttack **2023–2027**
  CGPA: 8.89/10 (Up to 6th Semester)
- **Class XII (Science)**, Sai International School, Bhubaneswar, CBSE **2023**
  Percentage: 86%
- **Class X**, Sai International School, Bhubaneswar, CBSE **2021**
  Percentage: 94.2%

Certifications & Training

- **Generative AI**, Ministry of MSME **May–Jun 2026**
  Deep Learning, RNN/LSTM, LangChain, RAG
- **Software Engineering Internship**, Odisha Computer Application Centre **Jul–Aug 2025**
  HTML, CSS, JavaScript, Python, MySQL
- **Python Programming**, Ministry of MSME **May 2024**
  Python Fundamentals, Data Types, Control Flow, Functions, OOP, Exception & File Handling, Modules & Packages
